I specialise in enterprise design systems, scalable product operations, rapid prototyping, web/app design and AI-enabled workflows that improve delivery speed and consistency across large and small organisations.

At Ticketmaster, I currently lead the evolution of a global design system spanning eight products and supporting collaboration across distributed design and engineering teams. My work focuses on governance, contribution models, token architecture, accessibility, and operational scalability.

More recently, I've been exploring how AI can improve design and engineering workflows through MCP infrastructure, machine-readable systems, rapid prototyping, and workflow automation, helping teams reduce friction between design, documentation, and implementation.

Alongside leadership and strategy, I remain hands-on with end to end product design, systems thinking, and cross-functional collaboration, and I love helping teams rapidly test ideas, scale operationally, and deliver high-quality user experiences across complex platforms.

Core Skills

- Enterprise & Startup Design Systems
- AI-Driven Product Operations
- Design Operations & Governance
- MCP Infrastructure & AI Workflows
- Federated Contribution Models
- Multi-Brand Design Systems
- Team Development & Coaching
- Scalable Product Systems
- Accessibility & WCAG
- Cross-Functional Leadership
- Product Design Leadership
- Product Engineering Collaboration
- Product Discovery & Delivery
- Rapid Prototyping
- High-Fidelity Product Prototyping

Platforms & AI Workflows

- Figma
- Storybook
- Claude Code
- MCP Infrastructure
- Workflow Automation
- AI-Assisted Prototyping
- Agent Workflows
- Reusable AI Skills
- Front-End Collaboration
- Xcode

Ticketmaster – Mar 2024 – Present – FT

Associate Director, Global Design Systems

- Leading the evolution and operational scaling of Ticketmaster's Global Design System across eight products and multiple business verticals.
- Established a federated contribution model enabling 20+ designers across distributed product teams to contribute into a single governed system.
- Defined and implemented token architecture supporting scalable multi-brand theming across enterprise platforms.
- Introduced AI-enabled workflows using MCP infrastructure, Claude, and Figma Make to accelerate component delivery and improve design-to-engineering collaboration.
- Improved cross-team consistency, governance, and operational scalability across complex product ecosystems.
- Partner closely with product and engineering leadership to align design system strategy with delivery outcomes and platform scalability.
- Mentor and support designers across product teams, improving design maturity and scalable ways of working.

ATG Tickets – Aug 2022 – Jan 2024 – Contract

Head of Digital / Principal Product Designer

- Led digital product design across web and mobile platforms for a global ticketing and e-commerce business.
- Established and scaled a design system to improve consistency, operational efficiency, and delivery speed across teams.
- Defined UX strategy across key customer journeys, improving usability and supporting conversion-focused product experiences.
- Built and developed design capability through scalable workflows, collaboration models, and structured delivery processes.
- Collaborated with senior stakeholders to align customer experience strategy with commercial and operational objectives.

CMC Invest – May 2022 – Aug 2022 – Contract

Principal Product Designer

- Led product design for a mobile-first investment platform within a fast-paced fintech environment.
- Delivered scalable UX and UI solutions across complex financial workflows and customer journeys.
- Partnered closely with product and engineering teams to improve delivery quality and implementation consistency.
- Introduced design system thinking and reusable design approaches to improve scalability across the platform.

Yell – Feb 2022 – May 2022 – Contract

Lead Product Designer

- Led UX and product design initiatives across B2B digital products and SME-focused experiences.
- Delivered responsive and mobile-first experiences across customer-facing platforms.
- Introduced structured design processes and improved research and collaboration workflows.
- Contributed to scalable design system development and reusable UI standards.

CX Partners – Dec 2021 – Feb 2022 – Contract

Senior User Experience Consultant

- Delivered UX strategy and service design across large-scale digital learning platforms.
- Led user research, journey mapping, and stakeholder workshops across complex systems.
- Facilitated cross-functional alignment sessions and produced end-to-end UX deliverables from discovery through delivery.

Hargreaves Lansdown – Nov 2018 – Nov 2021 – Contract

Lead User Interface Designer

- Led UI design across web platforms for a major financial services organisation.
- Contributed to the evolution of the organisation's design system and reusable UI standards.
- Delivered responsive and accessible experiences across multiple financial products and services.
- Worked closely with engineering teams to ensure high-quality implementation and scalable delivery.

Parmenion – Nov 2016 – Nov 2018 – Contract

Senior Product Designer

- Delivered UX and UI design across digital financial platforms and investment experiences.
- Led interaction design and user research initiatives across multiple product areas.
- Collaborated with cross-functional teams to deliver scalable product improvements and customer-focused experiences.

Earlier Experience – 2010 – 2016 – Contract

User Experience & Digital Designer

Worked across major brands including:

BBC, Sky, UEFA, Disney, Expedia, Comic Relief, Sky Sports, Dr WHO, Cravendale, Guinness, Arla

Delivered UX, digital product, and design system work across media, Entertainment, FMCG, sports, finance, and e-commerce sectors.
